

Southern Manufacturing

Job Description – Fabrication Estimator

Qualifications/Experience:

- BSME or Associates in Manufacturing Engineering Technology
- 5 years experience in Sheet Metal Fabrication
- 3 years experience in Cost Estimating and Quotations
- Demonstrated ability to manage relationships with Customers
- Proficient in Product Life Cycle Management and Value Engineering
- Competent in MRP/ERP Systems

Responsibilities:

- Analyze site plans, specifications and other documentation to prepare time, cost, materials, and labor estimates for both signs and bare enclosures
- Consult with clients, vendors, sales and operations staff. Maintain open lines of communications and rapidly resolve issues.
- Manage product life cycle for bare enclosures and signs. Ensure revision control and drawing integrity.
- Coordinate the drawing submission of bare enclosure to the Sales Team. Ensure drawings are accurate, timely and modified as required to obtain approvals.
- Load Shop Orders in ERP system. Ensure accurate Job Packets are provided to Operations.
- Identify Cost Savings opportunities and push continuous improvement throughout the life cycle
